

endeavour 500

The versatile and dependable Endeavour 500 sets the standard in the 16½ft fast fisher market. What really separates the Endeavour 500 from its competitors is the hull's stringer system which incorporates 15 separate buoyancy chambers – rendering the boat virtually unsinkable and ensuring a safe and stable ride through choppy seas.

The Endeavour 500 is ideal for keen sea and lake anglers with plenty of deck space and deep freeboard. The deep freeboard makes it a particularly incredibly safe and sturdy boat for families with younger children.

Speeds in excess of 35 knots are achieved when powered by a 60HP engine, transforming the Endeavour 500 into excellent sports boat. And because of its size and weight, the Endeavour 500 is the perfect boat to tow with a family car and single handed launching and retrieval.

Endeavour 500 standard features Opening front hatch, Polycarbonate windows, Sealed 15 chamber under floor buoyancy system, Lockers in forward seat moulding and steering console, Heavy duty bow roller, Self draining anchor locker, Stainless steel bollard, Stainless steel grab rails, Stainless steel cleats, Rod holders.

A comprehensive range of options ensure that boats are tailored to meet customers' precise requirements.
